***For Immediate Release***

**GLOBAL PARTNERS LP SELECTS ENSITE SAFARI SUITE® AS  
ENERGY MANAGEMENT SOFTWARE SOLUTION**

Omaha, Nebraska - EnSite Incorporated, a leading provider of software solutions and transaction management services for energy companies and service providers, announces that Global Partners LP has selected EnSite's Safari Suite® system for account management, billing and customer care for natural gas end users in New England and New York.

EnSite Safari Suite® ([www.ensite.com/products.htm](http://www.ensite.com/products.htm)) is a powerful multi-commodity energy management software solution built to accommodate the entire life cycle of the retail energy consumer. It allows EnSite's customers to reduce transaction costs, improve cash flow, preserve margins, and expand their business with existing staff.

EnSite Safari Suite® will provide Global with automated customer enrollment and billing transaction management for its customers operating under New York utilities' EDI (Electronic Data Interchange) transaction model, with planned expansion into new EDI-based markets later in the year. EnSite Safari Suite's EDI transaction management capabilities allow users to manage customers, pricing, commodity usage records and invoicing from the Safari Suite interface, while highly automating corresponding EDI transactions. EnSite Safari Suite EDI operations are compliant with New York EDI specifications for major New York utilities, allowing Global to immediately begin serving existing customers and enrolling new customers in the region.

"EnSite Safari Suite® is an effective tool to manage our natural gas customer base as we expand this product line across the Northeast and Mid-Atlantic markets," said Miles Allen, Vice President of Commercial Fuels for Global Partners.

"We're pleased Global Partners has selected EnSite's operational framework to support its expansion into EDI-based markets, and we look forward to helping bring enhanced efficiencies to the Partnership's natural gas operations," said Rod Bates, president of EnSite. "Our shared experience with the complexities inherent in managing today's dynamic energy market will open up new opportunities for Global in New York and beyond. We're looking forward to being a part of that growth."

**About Global Partners LP**

Global Partners LP, a publicly traded master limited partnership based in Waltham, Massachusetts, owns, controls and has access to one of the largest terminal networks of refined petroleum products in the Northeast. The Partnership is one of the largest wholesale distributors of gasoline, distillates (such as home heating oil, diesel and kerosene) and residual oil to wholesalers, retailers and commercial customers in the region. Global Partners LP, a FORTUNE 500® company, trades on the New York Stock Exchange under the ticker symbol "GLP." For additional information, please visit [www.globalp.com](http://www.globalp.com).

**About EnSite Incorporated**

Headquartered in Omaha, Nebraska, EnSite provides leading-edge software solutions and transaction management services in the deregulated energy marketplace. EnSite's hallmark application is EnSite Safari Suite®, which is unique in its approach to provide fully-integrated CIS and utility commodity management at the retail level. For more information about the company, visit our web site, [www.ensite.com](http://www.ensite.com).
